

## **Parts needed for installation:**

The pipes can be bought at just about any hardware store.  
You want to get Steel Pipe either Black Pipe or Galvanized.  
If the pipe size for your existing system is larger than 3/4 inch NPT  
you will need to get reducers to adapt to the Smoke Stalker System  
as it is designed to mount on 3/4 inch pipe.

We recommend a minimum of 18 inch lengths from the stack so the heat  
will not effect the unit and reflector.

8 inch lengths are sufficient for the mounting sections.

2- 3/4 inch elbows.

If you have a B&L or Crawford Crematory you can leave the reflector side as it is.

## **Wiring:**

This part takes someone with the appropriate skills for the job.

If you do not feel comfortable wiring the Smoke Stalker we recommend hiring an electrician.

***Units damaged due to faulty installation will not be covered by the warranty.***
